

Figure 6.9. Graphical representation of pairings of operators arising in the momentum-space evaluation of the S -matrix. The expressions on the right are the factors that must be included in the momentum space integrand of the S -matrix for each line of the Feynman diagram.

(see Figure 6.9) for calculating contribution to the S -matrix as integrals over momentum variables:

- (i) Draw all Feynman diagrams of the desired order, just as described in Section 6.1. However, instead of labelling each vertex with a spacetime coordinate, each internal line is now labelled with an off-mass-shell four-momentum, considered conventionally to flow in the
